To Whom It May Concern,

I would like to express my appreciation to the members of the New Jersey Water Association for the on-site assistance and TCH training provided to us over the years.

Thomas Tsismetzoglou assists us with any wastewater issues we have. He is also helping us with the monthly reports of the wastewater treatment plant. Lately, he walked us through the modernization of the new NJDEP portal and the updated way to submit our reports. Specifically, he helped us conduct and submit our DMR, RTR and WCR.

Dave Leister prepared our annual Consumer Confident Report (CCR) and he is always assisting with any regulatory or compliance issues we encounter on the water side.

Additionally, whenever we have a water main break, Paul Britt will bring the leak detector and find the problem for us to fix.

All the above services that New Jersey Water Association provided to us were very important for our daily operations. Being a small system with limited resources and personnel, it is great to know that we can get assistance whenever needed.

I once again would like to thank the staff of NJWA for the support provided to our system for many years.

Respectfully,

Rod Lucas  
Superintendent  
Wrightstown, MUA
