

Distribution System Water Quality

The New Jersey Water Association

Description: This course developed by Michael Furrey from ILM Services will cover the basics of a public water distribution system. The instructor will cover the operation and maintenance of a drinking water distribution system and how it relates to water quality. Attendees will get a great understanding of these concepts to help with their work duties while gaining insights into advancing their operations career. This course will help with taking any water distribution or treatment license.

Agenda:

8:00-8:30 am Registration and Sign-In
8:30-1:00 pm Regulatory Overview
 History of Distribution System Design
 Distribution System Operation
 Distribution System Operational Concerns
