For each TC+ routine sample:
1. Test each TC+ sample for \textit{E. coli};
2. Collect 3 repeat samples for each TC+ routine sample
3. Collect triggered GWR source monitoring sample from each well that was in operation\(^1\)

---

If any of the following are true:
1. Level 2 assessment trigger; OR
2. Coliform treatment technique violation; OR
3. Within past 12 months had two coliform monitoring violations OR one coliform monitoring violation and one Level 1 assessment trigger

---

NOTES
\(^1\)Refer to GWR Flow Chart for sampling, public notice, and corrective action requirements
\(^2\)Level 2 required if previously triggered Level 1 assessment within past 12 months
